## About Me

"Highly skilled and diligent programmer, always seeks to learn, and improve on existing ways. Extremely resourceful and an avid self-learner, have been practicing coding since the age of 14 years old."

## Education

### American Degree Program (Computer Science Major)

Taylor's University

05/2017 - 04/2019

- Programming in C++
- Computer Programming - Java
- Object-Oriented Programming (C++)

## Experience

### Administrative Assistant

Sri Emas International School

12/2016 - 02/2017

- Scrutinized the workings of their proprietary school management system. (SchoolHub)
- Reported bugs and inconsistencies to developers.
- Suggested UX refinements for ease of use from an administrator's perspective.
- Formulated a guidebook for new users of the school management system.

## Projects

### Maze Runner Game

Final academic project

- Created a game within the time frame of 2 days.
- As a team leader, delegated tasks according to groupmate's strengths and weaknesses.

### Course Checker

Personal project

- Vision to improve university's course pre-registration process.
- Helps students plan their courses for the upcoming semester by generating a visual timetable.

### Fishackathon 2018

by HackerNest

- Built an android app to generate awareness of region specific fishing laws.
- Presented to judges working in the fishing industry.
